Summary

Data Science student with hands-on experience in Deep Learning and NLP. Built systems ranging from CNN based handwriting recognition to NLP pipelines for financial text analysis. Passionate about developing AI driven applications and solving real world problems through machine learning. Actively seeking opportunities to contribute to impactful AI projects and grow within a team that values innovation and technical excellence.

Education

FAST NUCES

BS in Data Science, CGPA: 3.00

Relevant Coursework: Data Structures, Algorithms, Statistical Inference, Database Systems, ML.

Islamabad

2023 - Present

The Science School

O/A Levels

Islamabad

Completed

Professional Experience

Folio3 Software Pakistan

Software Engineering Intern

Islamabad, Pakistan

Jun - Aug 2026

- Contributed to **full stack web development** tasks using modern frameworks, collaborating with cross-functional engineering teams on production-grade software.
- Gained hands-on industry experience in software development lifecycle, code review practices, and agile sprint workflows.

TUKL Lab, NUST SEECs

Research Intern

Islamabad

Jul - Aug 2025

- Optimized **Convolutional Neural Networks (CNNs)** for Urdu handwritten character recognition, enhancing accuracy via rigorous hyperparameter tuning and data augmentation.
- Conducted extensive data preprocessing and normalization to ensure high quality training sets for high performance deep learning model training.

Certifications & Achievements

2025: Deep Learning Specialization, DeepLearning.AI (Coursera)

2025: Advanced Data Analytics Professional Certificate, Google (Coursera)

2025: Certificate in Data Visualization, NASCON FAST

Key Projects

Full Stack AI Project

Evolv: AI Powered Startup Execution Platform

Next.js, FastAPI, PostgreSQL, Groq/Llama

- Architected and built a **production-grade full stack platform** converting startup concepts into structured 10 section Technical PRDs via a 3-agent AI pipeline.
- Engineered **real-time WebSocket messaging**, skill-based developer and founder matchmaking, Stripe Connect milestone payments, and a live Execution Readiness Index.

NLP Project

Efficient Earnings Call Summarization & Risk Extraction

Python, NLP

- Developed an **NLP based system** to summarize company earnings calls and extract financial risk related insights from textual data.
- Worked on text preprocessing, information extraction, and language understanding techniques for efficient analysis of long form financial transcripts.

Deep Learning Project

Heart Disease Prediction using Deep Learning

TensorFlow/Keras

- Built a **deep learning model** to predict the likelihood of heart disease using medical datasets.
- Implemented and experimented with **MLP and CNN** architectures, along with preprocessing and model evaluation techniques to improve prediction performance.

Full Stack Database Project

Movie Community Management System

Node.js, MySQL

- Developed a **full stack web application** with complete frontend and backend integration using Node.js and MySQL.
- Designed complex database queries, ERDs, stored procedures, and scalable database management features for efficient user interaction and content management.

Technical Skills

Languages: Python (Pandas, Scikit-learn), SQL (MySQL), R, C++, C#, JavaScript (Node.js), TypeScript

Data Science: Machine Learning, Deep Learning (MLP, CNN), NLP, Regression, Clustering, EDA, Data Cleaning, Visualization

Web & Backend: Next.js, React, FastAPI, Node.js, REST APIs, WebSockets, PostgreSQL, Alembic

Tools & Tech: Git, Jupyter Notebooks, TensorFlow/Keras, Tableau, Latex, Groq API, Supabase, Stripe

Soft Skills: Analytical Thinking, Problem Solving, Collaborative Research, Agile Teamwork
